

CONTENTS

VOLUME 1

KEYNOTE LECTURES	1
Preamble to the 'Annual Clements / Foyster Lecture'.....	2
Essential Complementarities: Arguing for an Integrative Approach to Research in Mathematics Classrooms.....	3
David Clarke	
The Impact of Mathematics Education Reform in New Zealand: Taking Children's Views into Account.....	18
Jenny Young-Loveridge	
PRACTICAL IMPLICATION AWARD (PIA) LECTURE	33
Variation and Expectation as Foundations for the Chance and Data Curriculum	35
Jane M. Watson	
INVITED SYMPOSIUM	43
Building Connections: Research, Theory, and Practice.....	45
Di Siemon	
A Mathematics Teacher Educator's Perspective of Building Connections between Research, Theory, and Practice	46
Colleen McMurchy-Pilkington	
From the Hill to the Swamp: Combining Research and Practice	50
Peter Gould	
Building connections: Research, Theory and Practice — A View from the Profession	54
Will Morony	
Building connections: Research, Theory and Practice — A view from a Practitioner.....	58
Vicki Nally	

RESEARCH PAPERS	63
Rates of Change and an Iterative Conception of Quadratics	65
Karoline Afamasaga-Fuata'i	
The Role of Attention in Classroom Practice: Developing a Methodology	73
Janet Ainley and Michael Luntley	
Use of a Cultural Metaphor in Pre-service Mathematics Teacher Education.....	81
Dayle Anderson, Robin Averill, Herewini Easton and Derek Smith	
Implementing Problem Solving in Mathematics Classrooms: What Support do Teachers Want?	89
Judy Anderson	
I Didn't Know What I Didn't Know: A Case Study of Growth in Teacher Knowledge within the Intermediate Numeracy Project	97
Julie Anderson	
Conceptions and Tensions in Globalisation and Their Effects on Mathematics Educators	105
Bill Atweh and Philip Clarkson	
Using Jamie's Experiences: An Investigation into Using Teachers' Stories in Pre-service Mathematics Teacher Education.....	113
Robin Averill and Roger Harvey	
Students' Views on Using CAS in Senior Mathematics.....	121
Lynda Ball and Kaye Stacey	
A New Scale for Monitoring Students' Attitudes to Learning Mathematics with Technology (MTAS).....	129
Anastasios Barkatsas	
It Depends on the Students: Influencing Teachers' Beliefs About the Ends and Means of Numeracy Teaching.....	137
Kim Beswick	
Experienced and Novice Teachers' Choice of Examples	145
Chris Bills and Liz Bills	

Alan Bishop, Barbara Clarke, Debbie Corrigan and Dick Gunstone	
The Mathematics Talk of a Secondary School Teacher of Mathematics and Physics	161
Michelle L. W. Bower	
Algebraic Thinking in the Numeracy Project: Year One of a Three-Year Study.....	169
Murray S Britt and Kathryn C Irwin	
Affordances of a Technology-Rich Teaching and Learning Environment.....	177
Jill P Brown	
“I Type What I Think and Try It”: Children’s Initial Approaches to Investigation Through Spreadsheets.....	185
Nigel Calder	
Primary Students’ Mental Computation: Strategies and Achievement	193
Rosemary Callingham	
Developing Effective Teachers of Mathematics: Factors Contributing to Development in Mathematics Education for Primary School Teachers.....	201
Jean Carroll	
Enhancing Mathematical Understanding Through Self-assessment and Self-Regulation of Learning: The Value of Meta-Awareness.....	209
Rosemaree Caswell and Steven Nisbet	
The Value of Play to Enhance Mathematical Learning in the Middle Years of Schooling	217
Rosemaree Caswell	
Early Numeracy Coordinators in Victorian Primary Schools: Components of the Role, Highlights and Challenges	225
Jill Cheeseman and Doug Clarke	
Teaching Elementary Probability: Not Leaving it to Chance.....	233
Helen Chick and Monica Baker	
Children’s Mappings of Part-Whole Construct of Fractions	241
Mohan Chinnappan	
Prospective Teacher’s Representations of Multiplication	249
Mohan Chinnappan	

The Evaluation of the Success in Numeracy Education Program	257
Doug Clarke, Gerard Lewis, Max Stephens and Ann Downton	
Conceptual Understanding of Spatial Measurement	265
Margaret Curry and Lynne Outhred	
Learning to Notice: One Aspect of Teachers' Content Knowledge in the Numeracy Classroom	273
Ngaire Davies and Karen Walker	
How Unusual is the Gender Specificity of Mathematical Test Item Types Reported for Dutch Primary School Students?	281
Lorraine Davis, David Clarke and Marja van den Heuvel-Panhuizen	
Assessing Primary Students' Knowledge of Networks, Hierarchies and Matrices using Scenario-Based Tasks	289
Carmel Diezmann	
Pedagogy by my Standards: A Teacher's Views on Two Process Standards.....	297
Jaguthsing Dindyal	
Primary and Secondary Mathematics Practice: How Different is it?	305
Brian Doig, Susie Groves, Russell Tytler and Annette Gough	
A Mathematics Education Ghost Story: Herbartianism and School Mathematics	313
Nerida F Ellerton and M A (Ken) Clements	
Seventh-Graders' Mathematical Modelling on Completion of a Three-Year Program	321
Lyn D. English and Jillian L. Fox	
Mathematical Methods Computer Algebra System (CAS) 2004 Pilot Examinations and Links to a Broader Research Agenda.....	329
Michael Evans, Pam Norton and David Leigh-Lancaster	
From Arithmetic to Algebra: Novice Students' Strategies for Solving Equations	337
Judith Falle	
Towards a Language-based Model of Students' Early Algebraic Understandings: Some Preliminary Findings.....	345
Judith Falle	
Integrating ICT into Professional Practice:A Case Study of Four Mathematics Teachers	353
Noleine Fitzallen	

Mathematics Teachers: A Study of Life Inside School and Beyond	361
Helen J. Forgasz and Gilah C. Leder	
Master, Servant, Partner and Extension of Self: A Finer grained View of this Taxonomy	369
Vince Geiger	
The Growth of Schematic Thinking about Derivative.....	377
Alan Gil delos Santos and Michael O. J. Thomas	
The Role of Online Discussion in Building a Community of Practice for Beginning Teachers of Secondary Mathematics	385
Merrilyn Goos and Anne Bennison	
Year 6 Students' Methods of Comparing the Size of Fractions	393
Peter Gould	
Reflections on Teaching Mathematics in an Exam-Driven School: An Autoethnography	401
Fiona Hagan	
How do we Provide Tasks for Children to Explore the Definitions of Quadrilaterals? ...	408
Alice Hansen and Dave Pratt	

VOLUME 2

RESEARCH PAPERS (continued)	417
Mental Computation: The Benefits of Informed Teacher Instruction	419
Ann Heirdsfield and Janeen Lamb	
Discourse as a Catalyst for Facilitating Practitioner Research	427
Beth Herbel-Eisenmann	
Potential of Technology and a Familiar Context to Enhance Students' Concept of Rate of Change	435
Sandra Herbert and Robyn Pierce	

The Effects of Number Knowledge at School Entry on Subsequent Number Development: A Five-year Longitudinal Study.....	443
Marj Horne	
Reforming Communication in the Classroom: One Teacher's Journey of Change.....	451
Roberta Hunter	
Mentoring Mathematics Teachers in Low Socio-Economic Secondary Schools in New Zealand	459
Barbara Kensington-Miller	
The Contested Notion of Sustainability: Possibility or Pipe Dream for Numeracy Reforms in New Zealand.....	467
Nicky Knight	
Students' Use of Context Knowledge in Interpreting Data.....	475
Cynthia Langrall, Edward Mooney and Nicole Williams	
Language Factors that affect Mathematics Teaching and Learning of Pasifika Students.....	483
Viliani F Latu	
How Primary Pre-service Teachers Perceive Mathematics Teacher Educators' Practice: A Case Study.....	491
Gregor Lomas	
Establishing a Numeracy Culture in a Distance Education Learning Environment: A Case Study.....	498
Tom Lowrie	
Formalising the Role of Indigenous Counting Systems in Teaching the Formal English Arithmetic Strategies Through Local Vernaculars: An Example From Papua New Guinea.....	505
Rex A. Matang	
Does Mathematics Education in Australia Devalue Indigenous Culture? Indigenous Perspectives and non-Indigenous Reflections.....	513
Chris Matthews, Leesa Watego, Tom J Cooper and Annette R. Esturo	

Professional Development as a Catalyst for Changes in Beliefs and Practice: Perspectives from the Early Numeracy Research Project.....	521
Andrea McDonough and Barbara Clarke	
Growth of Teacher Knowledge within an On-line Collaborative Learning Environment.....	529
Mathew McDougall and Rod Nason	
The Use of Algebra in Senior High School Students' Justifications.....	537
Tamsin Meaney	
Measuring Fractions.....	545
Annie Mitchell	
What Does Mathematics Understanding Look Like?.....	553
Judith Mousley	
Where Did I Go Wrong? Students' Success at Various Stages of the Problem-Solving Process.....	561
Tracey Muir and Kim Beswick	
Understanding Students' Reasoning While Comparing Expressions.....	569
Shweta Naik, Rakhi Banerjee and K. Subramaniam	
Regional Differences in the Professional Development Needs and Preferences of Teachers of Primary Mathematics.....	577
Steven Nisbet	
Mathematics and the Construction of Feminine Gender Identity.....	585
Stephen Norton	
Do Teachers Change Their Practices While Participating in a Lesson Study?.....	593
Jo Clay Olson	
Teachers' Development of Substantive Communication about Mathematics.....	601
Kay Owens	
Preschoolers' Mathematical Patterning.....	609
Marina Papic and Joanne Mulligan	
The Effect of Money as a Context on the Mental Computation Performance of Students in Years 3, 5, 7 and 9.....	617
Anne Paterson and Jack Bana	
Mathematical Beliefs and Achievement of Pre-service Primary Teachers.....	625
Bob Perry, Jenni Way, Beth Southwell, Allan White and John Pattison	
Student Misconceptions about Projectile Motion.....	633

Anne Prescott and Michael Mitchelmore	
Subject Matter Knowledge: Mathematical Errors and Misconceptions of Beginning Pre-Service Teachers.....	641
Julie Ryan and Barry McCrae	
Education for Early Mathematical Literacy: More Than Maths Know-How.....	649
Abigail Sawyer	
Preservice Teachers' Intentions to Provide Good Examples and Help Children Replicate Them.....	656
Anne Scott	
Understanding the Role of Assumptions in Mathematical Modeling: Analysis of Lessons with Emphasis on 'the awareness of assumptions'.....	664
Tatsuhiko Seino	
Exploring Pre-service Teachers' Reasoning about Variability: Implications for Research.....	672
Sashi Sharma	
Building a Methodology for the Comparison and Evaluation of Middle-Years Mathematics Textbooks.....	680
Mal Shield	
Assessing Multiple Objectives with a Single Task in Statistics.....	688
Jane Skalicky	
Relative Risk Analysis of Educational Data	696
Kaye Stacey and Vicki Steinle	
Concerns Relating to the CAS Use at University Level.....	704
Sepideh Stewart	
The Integration of Mathematics and Music in the Primary School Classroom.....	712
Kathryn Still and Janette Bobis	
Interactive Whole Class Teaching and Interactive White Boards.....	720
Howard Tanner, Sonia Jones, Steve Kennewell and Gary Beauchamp	
Children's Views of their Teacher's Role in Helping them Learn Mathematics.....	728
Marilyn Taylor, Ngarewa Hawera and Jenny Young-Loveridge	
Students' Attempts to Solve Two Elementary Quadratic Equations: A Study in Three Nations.....	735
Pongchawee Vaiyavutjamai, Nerida F. Ellerton and M. A. (Ken) Clements	
Glimpses of Generative Practice: Constructing Pre-service Teachers' Learning in	

Partnership.....	743
Colleen Vale and Anne Davies	
Challenging Task-driven Pedagogies of Mathematics	751
Fiona Walls	
Patterns Supporting the Development of Early Algebraic Thinking.....	759
Elizabeth A. Warren	
An Indigenous Perspective on Mathematics Contextualisation in a Pre-school: From Safety to Empowerment.....	767
Leesa Watego	
Statistical Literacy over a Decade.....	775
Jane M. Watson, Ben A. Kelly and John F. Izard	
Teaching Percentage as a Multiplicative Relationship.....	783
Paul White and Michael Mitchelmore	
'I am really not alone in this anxiety': Bibliotherapy and Pre-service Primary Teachers' Self-image as Mathematicians.....	791
Sue Wilson and Steve Thornton	
Language Appropriate for the New Zealand Numeracy Project.....	799
Joanne Woodward and Kathryn C. Irwin	
Results of a Teaching Experiment to Foster the Conceptual Understanding of Multiplication Based on Children's Literature.....	807
Amanda Worley and Romina Jamieson-Proctor	
Prioritising the Voice of Researched: Using Photographs to Elicit Mathematical Thinking of Participants.....	815
Robyn Zevenbergen	
SHORT COMMUNICATIONS.....	823
Graphs, Transformations, Rates of Change and Quadratic Context Variations.....	825
Karoline Afamasaga-Puata'i	
Young Children Reasoning with Tables: Toward a Model.....	825
Maria Droujkova	
"My Mom Thinks I Should be an Engineer": Parental Influences and Girls on Track for Math-Related Careers.....	826
Maria Droujkova, Sarah B. Berenson, Irena Rindos and Sue Tombes	

Message from Student Teacher Constructed Posters.....	826
Shajahan Haja	
Persistent Mathematics Misperceivers: Two Case Studies.....	827
Martin Lamb, John Malone, Daniel Boase-Jelinek and Scott Lewis	
An Investigation of the Selection Process of Mathematically Gifted Students.....	827
Kyunghwa Lee, Kyungmee Park and Jaehoon Yim	
The Language of Zero: An Understanding of Place Value.....	828
Tracey Snape	
Mathematical Problem-Solving Frameworks of Different Mathematics-Anxiety Levels Students.....	828
Yeo Kai Kow Joseph	
ROUND TABLE DISCUSSIONS.....	830
Challenges for Mathematics Education in Pacific Island Nations in the 21st Century	832
Andy Begg	
Use of Projects in the Teaching of Statistics.....	832
Murray Black	
Keeping it Going: Exploring Ways to Sustain Professional Development in Numeracy	833
Fiona McDiarmid and Ruth Pritchard	
Preparing for Assessments of our Research Productivity.....	834
Peter Sullivan	
Do High School Students Need Mathematics to Prepare for the Academic Numeracy Demands of University?.....	834
Janet A Taylor and Linda Galligan
